

# The More the Merrier— and the Cheaper!

## Vanpool Fares

The chart below lists the various fares for vanpool riders, based on a standard 40-hour workweek, eight hours a day. As you can see, the more riders you have in your group, the lower your fare. (Remember: Drivers can ride for free!) To calculate your group's monthly fare, simply:

- Figure out your vanpool's daily round-trip mileage,\* starting from where you plan to park the van each night to your work destination, and then back again.
- Use the number of riders in your group to determine the size of the passenger van you'll need.
- In the far left column, locate your round-trip miles, and scan across to find your van size. To get each individual's

monthly fare, take the fixed-rate cost and divide by the number of riders. (For example, at 30 round-trip miles, the fixed rate for an 8-passenger van is \$390. With seven riders, the monthly fare per person would be \$55.71.)

### Other ways your fare can be affected.

Your fare may be even *lower* if your employer subsidizes the cost of transportation. Ask your company's Employee Transportation Coordinator. Alternative work schedules\*\*—such as 4/10s, 9/80s, or seven-day workweeks—will also affect the monthly fare. Before you buy a pass, make sure it can be applied to vanpool fares.
